Order from DTIC or SDA \$1.10 61-23640

Trans. of Kinetics i Kataliz (USSR) 1960, v. 1, no. 3,
p. 374-378.

DESCRIPTION: *Hydrogen; Molecules; *Catalysts;
Chemical reactions.

Various catalysts are considered in relation to the
mechanism of the homogeneous catalytic activation of
molecular hydrogen. It is supposed that a ligand re-
sponsible for opening the molecular orbital can take
part in the building up the transition state (in the dative
bond). This effect appears to be of decisive importance
in the activation of molecular hydrogen and of unsatu-
rated compounds. (Author)
